

APPLICATIONS	<p>We accept files created using the following programs Quark Express 6.5 Adobe Creative Suite 3 (InDesign, Illustrator, Photoshop)</p> <p>PDF As PDF files are a closed format, changes for artwork, colour correction and low image resolution are common problems, when used for large format printing. If you have to supply a PDF file, please ensure all text is converted to outlines and all images are high resolution.</p>
CREATING A FILE	<p>Size Where possible create the file at actual size. If scaling is required it should not be less than 10% of the artworks actual intended size.</p> <p>Bleed To ensure accurate sizing, bleed must be added to the image area. Standard minimum bleed for Internal prints unmounted and mount substrates: 10mm External prints on substrates: 20mm Banners with Standard finishes 50mm Wall Canvas 100mm</p>
COLOUR MANAGEMENT	<p>Wizardry has established a colour managed workflow to achieve a rich black the CMYK breakdown needs to be Cyan 80%, Magenta 60%, Yellow 50%, Key 100% (Black) File colour setting are RGB: sRGB IEC61966-2 and CMYK: US Sheetfed Coated v2. Supply printed colour proofs as a visual of what you are expecting with any Pantone colours used indicated.</p>

IMAGES	<p>Ensure you supply all linked image files with your layout application documents. When placing documents in Illustrator always choose to link to the original, rather than embedding the images within the document. Required image resolution is 75dpi at final output size. Save as an EPS. with encoding (JPEG maximum quality)</p>
COMPUTER CUT VINYL	<p>Artwork for computer cut vinyl must be supplied as vector art and preferably supplied as an Illustrator EPS file.</p>
SUPPLYING FILES	<p>Storage Media Files to be supplied on CD, DVD or please download FTP site details by visiting the following web address <a href="http://www.wizardry.com.au/downloads">http://www.wizardry.com.au/downloads</a></p> <p>Email please only email files that are smaller than 3mb</p>
